TECHNICAL DATA SHEET

Chryso®Nutralset TC

Hydration Controlling Admixture

DESCRIPTION

CHRYSO NutralSet TC is a ready-to-use liquid solution designed to control the hydration process in Portland cement-based concrete and concrete wash water. CHRYSO NutralSet TC allows reducing disposal costs associated with concrete wash water, and reducing running water consumption.

Meets or exceeds the requirements of ASTM C-494 Type B and S

ADVANTAGES

- Reduces Concrete Temperature Rise in Hot Temperatures
- Minimal Effect on Initial Slump
- Increases early and ultimate compressive and flexural strengths
- Enhanced Slump Retention
- Reduced Disposal Cost with Returned Concrete
- Reduces Concrete Build-up in the Drum

FIELDS OF APPLICATION

- All Cement Types
- Ready Mix Concrete
- Precast Concrete
- Post Tensioned and Prestressed Concrete
- Hot Weather Concreting

Method of Use

Dosage

- The recommended dosage rate for CHRYSO NutralSet TC is 1 to 12 oz/cwt (65 783 ml/100 kg) of cementitious material for a Type B & S.
- For Wash Water Treatment the recommended dosage rate is 24 to 80 fluid ounces (710 to 2366 ml) per truck CHRYSO "NutralSet TC can be added with the initial water or on the wetted concrete, it should not be added with or on the dry cement.
- Dosage rates vary as a function of concrete temperatures or when used in conjunction with other CHRYSO admixtures.
- Trial mixes should be conducted to determine the dosage rate need.
- Because local job conditions vary, please contact your local CHRYSO sales representative for further assistance if using the product outside the recommended dosage ranges.

CHARACTERISTICS

PACKAGING

PRECAUTIONS

• CHRYSO NutralSet TC should be stored at or above 34°F (1°C). If frozen, thaw and agitate thoroughly to return to its normal state before use. Do not use pressurized air for agitation.
