

Chryso® Konis

Dust Suppressant

AREAS OF USE

CONCRETE
PLANTS & YARDS

HAUL ROADS &
ACCESS ROADS

MINES &
QUARRIES

CONSTRUCTION
SITES

Clearer Paths. Less Water. Higher Productivity.

Site Challenges

- Water usage & costs
- Regulatory compliance
- Site health & safety
- Community impact
- Operational efficiency

The Solution

Bio-based polymer technology that binds fine surface particles to help:

- Reduce airborne dust
- Improve site visibility
- Maintain surface stability
- Enhance worker health & safety
- Support operational efficiency
- Reduce water demand

Users should consult local authorities for applicable requirements and application guidance.

Every Concrete Producer Faces Pressure to do More with Less:

Lower carbon, improve performance, increase productivity, and control costs. Chryso partners with customers to overcome these challenges through innovative construction chemicals, digital solutions, and hands-on technical expertise that drive measurable results.

Contact your local territory manager for a comprehensive solution review.
